

Interventional Radiology Locums - Victoria BC

Locum Interventional Radiologist

Type of Remuneration: Locum rate: \$3200 per day.

Dates: Flexible

About the Opportunity:

The Department of Radiology at Victoria, British Columbia seeks to recruit a locum radiologists with Interventional Radiology subspecialty.

The successful applicant(s) will help a group of 26 Radiologists, including 6 other Interventional Radiologists, who cover the Royal Jubilee Hospital, Victoria General Hospital, Saanich Peninsula Hospital, Lady Minto Hospital, the BC Cancer Agency and a variety of clinics in Victoria, BC.

Through our two Siemens Artis Q equipped interventional suites, we provide Interventional Radiology services to the whole Vancouver Island with a population of approximately 870 000. We offer essentially the gamut of body interventional radiology. Although vertebroplasty, diagnostic neuroangiography and endovascular treatment for ischemic stroke is performed by our interventional radiologists, this is not a requirement for locums.

The average week consists of 2 – 3 days of Interventional Radiology with 2 – 3 days of General Radiology (including MR, CT, US, X-ray, biopsies, drainages and fluoroscopy procedures).

Call: can potentially be added depending on experience/desire.

Qualifications:

Candidates must hold Royal College of Physicians and Surgeons of Canada certification in Radiology (FRCPC), a fellowship in Vascular/Interventional Radiology and be eligible for full licensure with the College of Physicians and Surgeons of BC.
